

Barn Owlets Half Term Learning Challenge

Barn Owls and Little Owls - Mrs Moran has a problem! Can you help her to solve it?

Mrs Moran has been looking after Giselle's bean plant for her. It's been growing beautifully and is now living outside all the time because it's so sunny and warm. Mrs Moran has re-potted it to give it a bigger new home as its roots were sticking out of the old pot so it couldn't take in all the nutrients (food) from the soil to help it keep growing.

However, on Wednesday morning Mrs Moran went to check on Giselle's plant as she was hanging the washing out and realised that something had eaten all three of the tiny bean pods. (Oh no!) There are still two huge bean pods on the plant but Mrs Moran is really worried in case that something comes back and has a nibble.

Can you help?

Your challenge (if you choose to accept it) is to have a really big think about how to protect Giselle's bean plant.

You could design a trap to catch whatever it is or something to keep her plant safe. Maybe you have another idea altogether.

It's up to you how to show us your invention - you could build it and take a photo, draw a plan and label it, or tell your idea to your mummy, daddy or whoever looks after you so they can write it down.

We look forward to seeing your solutions.

Lots of love and thanks for all your lovely learning
