

Continents and Oceans

Name the 7 continents in order from the largest to the smallest.

Describe the rainforest biome.

Fill in the blanks.

- oceanic mountains
- oceanic trench
- land
- ocean floor profile
- submerged crust

Near to the equator are two more imaginary lines called the Tropic of Cancer and the Tropic of Capricorn. Places between the Tropics of Cancer and Capricorn are known as tropical. They have a hot climate all year round.

Northern hemisphere

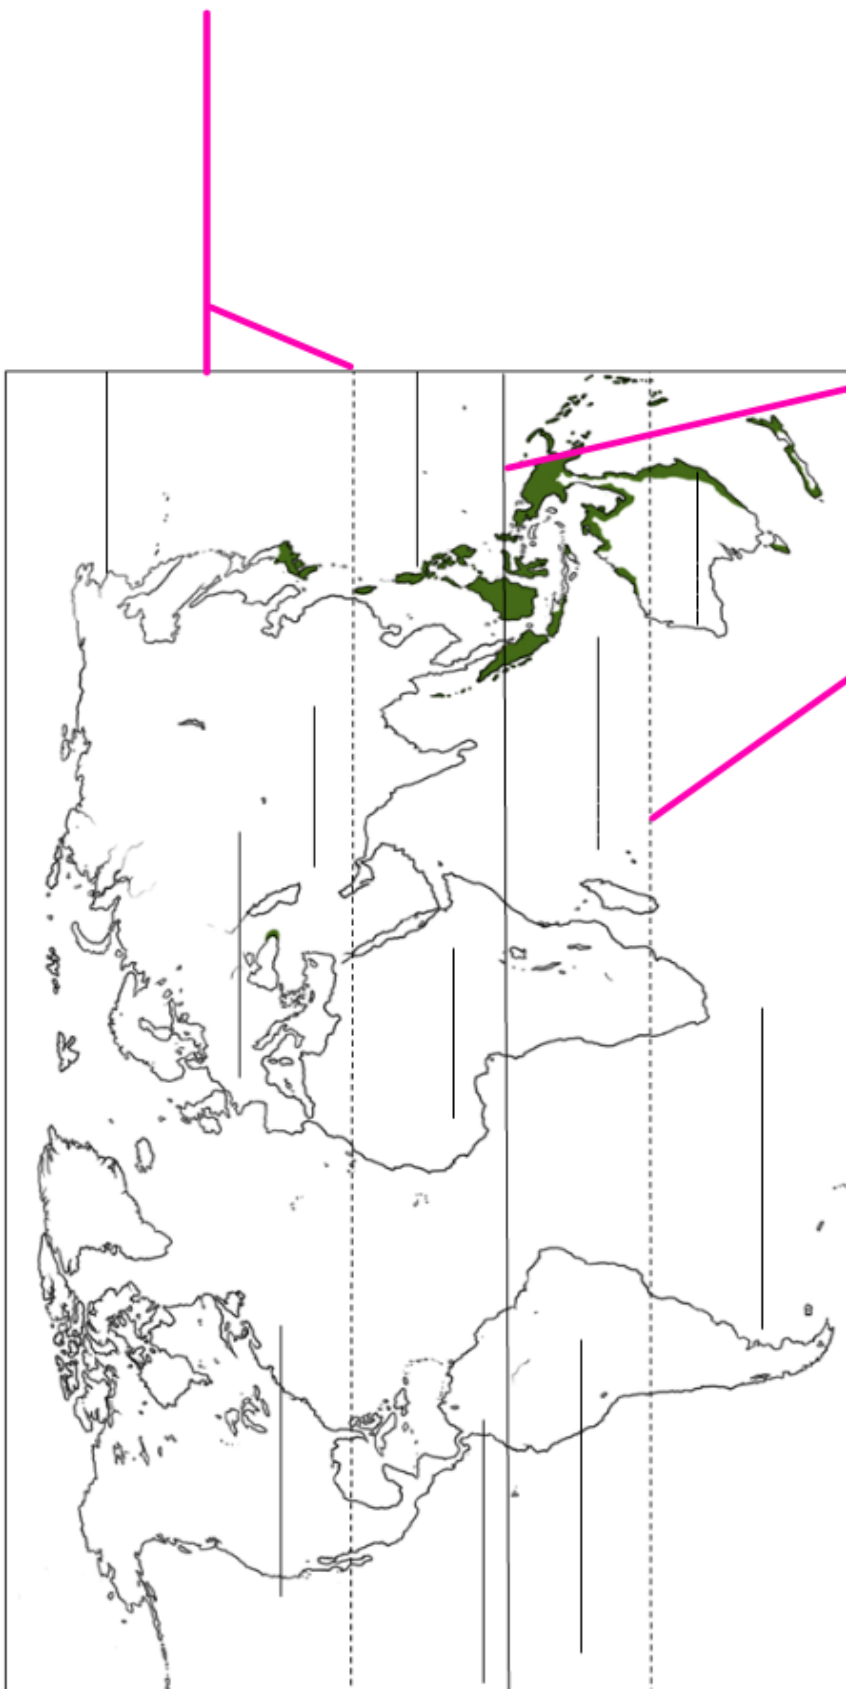

Southern hemisphere

Running from north to south is another imaginary line called the Prime Meridian.

This splits the Earth into two more hemispheres: the western hemisphere and the eastern hemisphere.

Fill in the missing key words on the pink lines.

Challenge: Add the prime meridian into the diagram.

What city does the prime meridian pass through?
