

Grow a Balloon 'Turnip'

Science Experiment

Method

1. Before you begin the experiment, blow up a balloon and let the air out. This will make the balloon easier to inflate when you do the experiment.
2. Put 2 tablespoons of bicarbonate of soda into the bottle.
3. Add 200ml of vinegar.
4. Immediately put the balloon over the mouth of the bottle and hold it in place tightly.
5. If the reaction is slowing down, give the bottle a gentle swish to mix the ingredients together.
6. Carefully remove the balloon and tie it off.

You will need:

- Bottle
- Vinegar
- Bicarbonate of Soda
- Balloon
